Note Taking. If all of the citations for a 10- to 15-min attention span originate with a 1978 article by Hartley and Davies (), then a thorough examination of this article is clearly warranted. What is remarkable regarding this publication is that attention span is not actually the subject of the article; rather, the subject of the manuscript is in fact "note taking."

Attention span during lectures: 8 seconds, 10 minutes, or ...

Study skills, academic skill, or study strategies are approaches applied to learning. They are generally critical to success in school, considered essential for acquiring good grades, and useful for learning throughout one's life. Study skills are an array of skills which tackle the process of organizing and taking in new information, retaining information, or dealing with assessments.

Taking great lecture notes before and during your lecture, but then leaving them to collect dust, is a waste of your time. Soon after the lecture is done, spend some time reviewing your notes and clarifying any points that may seem a bit vague. A few minutes on the same day, plus 10-15 minutes a few days later, will be enough.

17 TOEFL Note-Taking Tips for Listening, Speaking and Writing

The background section is pretty straightforward. It consists of a few sentences on what the research is about and why it is happening, which orients people to needs and expectations. The background also includes a problem statement (the central question you're trying to answer with the research findings). Example background:
