Capital Budgeting Examples And Solutions

In Capital Budgeting, Sunk cost is excluded because it is: of small amount; not incremental; not reversible; All of the above; Savings in respect of a cost is treated in capital budgeting as: An Inflow; An Outflow; Nil; None of the above. Risk in Capital budgeting implies that the decision-maker knows_____of the cash flows. Variability ...

Capital Budgeting - MCQ-Adda

Depreciation is an important concept in capital budgeting. This is because it is a non cash expense and ideally should not have any effect on the cash flows. This is the reason why it is added back during cash flow calculations. Since the amount of depreciation never actually left our bank account in the form of expenses, we still have it in cash.

Capital Budgeting and Depreciation - Management Study Guide

Zero-based budgeting is an approach requiring justification for every expenditure. In other words, each spending item starts with a budget value of 0. And, those requesting funds must justify all changes above 0. This requirement contrasts with the more usual practice, incremental budgeting. Under this method, each spending item starts at last ...
