Active learning is "a method of learning in which students are actively or experientially involved in the learning process and where there are different levels of active learning, depending on student involvement." Bonwell & Eison (1991) states that "students participate [in active learning] when they are doing something besides passively listening." " In a report from the Association for the ...

Active learning - Wikipedia

Biomedicine has built itself into a massive global institution and research enterprise while operating under that assumption (to repeat Krieger's phrasing from Section 1.1, the assumption is that "the domain of disease and its causes is restricted to solely biological, chemical, and physical phenomena" (Krieger 2011: 130)).
